

Doors and Drawers

Design A Door Program

Coppes Napanee offers a wide range of standard door styles. We understand that, occasionally, a custom door may be desired that we do not offer as one of our standard designs. Understanding that we have a select offering, we would gladly match, as close as possible, other designs for your customer. We are excited to create a completely unique door style for your custom kitchen.

With Coppes Design A Door program you can create a door style that allows you to change the door's frame, inside and outside edge and center panel profile. You can select grain direction, grain matching and even vary the wood species. The Design A Door program offers a variety of wood species, unlimited stains, paints and finish treatments, and tops it with optional sheen levels.

The Design A Door Program and how it works:

- We require that a custom door sample be made in advance for the customer's approval. This is done using our Design A Door Request form. The sample must be produced and approved prior to the final cabinetry order to be submitted to Coppes
- The size produced for a custom door is 13" x 15". If a matching drawer front is requested, an SDDF and a 13" x 24" drawer and door frame configuration should be requested.
- Once the custom door is shipped for approval, the back of the door will be labeled with a unique CD number, assigned by Coppes. This CD number will allow you to place your order for your custom door.
- If there are changes to the custom door sample, a new request must be submitted. The Design A Door request form must be completed, for the process to begin.
- Please note, if an order is submitted prior to the customer approval of the custom door, the order will be considered incomplete and placed on hold.

If you have any questions about the Design A Door Program please contact Coppes Customer Service.

Use the Design A Door Request form in the FORMS section of the catalog to start your design
